The T B. Prevention Trials Centre started in Bangalore during 1964 to study the effect of Mass BCG Vaccination in the control of T. B. with the assistance of WHO and PL 480 Funds. They have completed the trials in Bangalore Area during 1971 and submitted their completion report to the I.C.M.R. under whom the project is working. Along with this Centre they were having a Project in Chengleput area in Tamil Nadu under the same Director, whose office is at Bangalore. Now that the work is still being continued and the entire material for study is at Chengalput Distsict and only the Headquarters of the procjeet is in Bangalore. According to the agreement, the assistance for this project is upto 1976 June only at present. Now since the offico only is at Bangalore and the entire operatiou is in Chengalput District, the I.C.H.R. decided to shift the Headquarters to Chengalput. The plans and estimates have been sent to the Tamil Nadu Government already which is expected to be apyroved shortly. The Chice Engineer (Tamil Nadu) Government has promised to give the building duly completed within 8 months. In the meantime, the Director General, Indian Council of Medical Research, has issued orders to shift the Headquarters immediately to Chenglepnt in temporary buildings which have already been hired for the purpose. Now it is learnt that the I.B.M. computers which are in Bangalore will be shifted from 3th March 1975 onwards and the I B.M firm has been intimated to take up this work. The Director of the Projeet has already issued wrtten instructtons to the staff to shift to Madras. What I have learnt is that we have nothing to do with this. This was meant to help both the States ofTamil Nadu and Karnataka and they have to do the work now in Tamil Nadu because the period of that soheme was only up to 1966. This is under PL-480 and W.H.O. I am sarry I am unable to do anything in the matter because we have nothing to do with it.
